

PROBLEM STATEMENT #19 | Healthcare & Telemedicine

Personalized Meal & Diet Subscription Manager

Ankita Satish Vellara

PES2UG24AM021

5A-AIML

Use-Case ID: UC-01

Use-Case Name: Generate Weekly Meal Plan

Primary Actor: Dietitian

Preconditions:

1. The subscriber has an active dietary subscription.
2. The subscriber's dietary profile has been created.
3. Relevant dietary constraints, including allergies, calorie goals, and macronutrient requirements, are available in the system.
4. The dietitian is authorized to access and manage the subscriber's dietary information.

Main Success Scenario

1. The dietitian selects a subscriber whose weekly meal plan needs to be generated.
2. The system retrieves the subscriber's dietary profile and recorded metabolic constraints.
3. The dietitian reviews the subscriber's dietary information.
4. The dietitian initiates the weekly meal plan generation process.
5. The system validates the subscriber's dietary constraints and allergen exclusion list.
6. The system generates a weekly meal plan based on the subscriber's calorie goals and macronutrient requirements.
7. The system checks that the generated meal plan does not contain any excluded allergens.
8. The system displays the generated weekly meal plan to the dietitian.
9. The dietitian reviews and approves the meal plan.
10. The system saves the approved weekly meal plan and makes it available to the subscriber.
11. The use case ends successfully.

Alternate Flow: Invalid or Incomplete Dietary Constraints

5a. Dietary Constraint Validation Fails

1. The system detects missing, incomplete, or conflicting dietary information.
2. The system displays an error or validation message to the dietitian.
3. The dietitian reviews and updates the subscriber's dietary information or recommendations.
4. The system revalidates the updated dietary constraints.
5. If validation is successful, the use case resumes at Step 6.
6. If the dietary information cannot be resolved, the meal plan generation process is stopped until the required information is corrected.
